

# eBooks for All Kindle Devices except Fire

Camden Public Library and 140 other Maine libraries joined together to purchase the **Maine InfoNet Download Library**, a collection of 2,500 eBooks to “borrow” onto your Kindle free of charge. This collection is from **Overdrive**, the current leader in the eBook lending market. These eBooks come in Amazon’s proprietary format to transfer to your Kindle.

Anyone with a **valid Camden Public Library card** can access this collection.

## Step 1: Using your computer, search for the eBook you want on the Overdrive site. (Limit 3 eBooks at a time)

- Visit **Maine InfoNet Download Library** at <http://download.maineinfonet.org>.
- Using **Advanced Search**, choose **Kindle Book** in the **Format** drop-down box.
- Select the eBook you want and **Add to Cart** or **Place a Hold**.

If the eBook is available, click **Add to Cart**.

If the eBook is already checked out to someone else, click **Place a Hold**, provide your email address, and Overdrive will notify you when it is available.

## Step 2: Check out the eBooks to your library account.

- When you have added eBooks into your cart, click **Proceed to Checkout**.
- Select **Camden Public Library** from the dropdown menu and type your library card number at the prompts. For Camden Public Library, this is the **barcode** on the back of the card.
- At the Check-Out screen, select 7 or 14 day loan period from the drop-down menu, and then click **Confirm to Check Out**.

### Step 3: Transfer your eBook to your Kindle from your computer.

- Once you have checked out your eBook, click the  button which will open a new browser window with the Amazon website.
- You are redirected to Amazon.com's Public Library Loan page for that title. (You may be required to log in to your Amazon.com account -- or create a new account -- if you're not already logged in). To register a Kindle, select **Manage Your Kindle**, then **Manage Your Devices**, then **Register a Kindle**.)
- On this Amazon Public Library Loan web page, look to the right for a green box with the “**Get library book**” button and the dropdown menu to choose which device (if you have more than one) to deliver to. (**Kindle, Kindle Fire, Kindle Touch**, iPad, iPhone, etc.)
- Choose your device from the **Deliver to** menu, and choose **Get library book** to send the book to your reading app or device. 
- If your Kindle is **WI-FI capable**, your eBook will load directly to your Kindle and will appear in your booklist.
  - To connect to your WI-FI network, press the **Menu** button, then select **Settings** to choose a WI-FI network. Press the Menu button again to **Turn Wireless On**.
- If your Kindle is **not WI-FI capable**, Amazon will alert you. You must transfer the eBook using your USB cable to connect your device and your computer. Once the device and computer are connected, click the “**Download now**” and the eBook will appear in your booklist. Library books will not be delivered via your Kindle's 3G connection.

### Due Dates and Returns

- Your eBook is **due** either 7 or 14 days after you check it out, depending on the option you chose at the check-out screen. Amazon will notify you and the eBook is then no longer readable.
- You can check in the eBook early to be eligible to check out another eBook (3 eBooks max). Go to your Amazon account; choose **Manage Your Kindle**, then **Your Kindle Library**. Click the menu next to the eBook you want to return and select **Return this book**. If you return an eBook early, a **Loan Ended** notification will appear on that item in your Kindle booklist.

- Amazon offers Whispersync technology to preserve your notes and last page read if you decide to check out the same title later or purchase the eBook from the Kindle store. To retain this information, make sure your **Settings > Annotations Backup** is turned **on**. If you do not want to retain that information, turn it **off**.

### **Things to remember:**

- You can search and select eBooks from the Download Library through your Kindle browser, but you cannot download them directly from there. You must use a computer to download eBooks to your Amazon account and then transfer them to your Kindle.
- Please place holds on books that you are interested in reading. They use the number of holds on a given title to help decide if additional copies of a title should be purchased.
